ABOUT ME

Junior Environment Artist with a background in Digital Communication and Game Design, currently specializing in Environment Design for Video Games. Focused on 3D environment and asset creation, modeling, lighting and PBR materials. I combine artistic sensitivity with a technical mindset, with particular attention to composition, visual storytelling and the coherent integration of assets within game environments. My experience includes international game production in Paris within a multidisciplinary team.

PROFESSIONAL EXPERIENCE

Paris, France.
January 2025 –
March 2025

3D Artist – Curricular Internship

JimJames Games – Half Light

- Created and textured **3D game assets**, including three weapons for a post-apocalyptic project.
- Developed models in **Blender** and PBR textures in **Substance Painter**.
- Integrated completed assets into the studio's **proprietary game engine**.
- Worked within an international multidisciplinary team, gaining hands-on experience with a professional game production pipeline and delivering assets according to project requirements and deadlines.

Rome, Italy

Family-Owned Hospitality Business

- Support the day-to-day management of **four B&Bs and holiday rental properties**.
- Coordinate reservations, guest communication and operational activities across multiple properties.
- Manage digital communication and social media presence.
- Managed multiple responsibilities simultaneously, prioritizing daily operations and resolving issues independently

EDUCATION

Rome, Italy
2026-2027

Master in Environment Design for Video Games – 1st Level

Quasar Institute for Advanced Design

Environment Art, 3D Environment Creation, Lighting, Materials and Game Development.

Rome, Italy
2022-2025

Grade: 110/110

Bachelor's Degree in Digital Communication & Video Games

Link Campus University

Thesis: "Visual Perception in 3D: Light, Color and Narration in Video Games"

Research focused on visual perception, lighting and color theory, visual storytelling and the emotional impact of digital environments.

LANGUAGES

Italian: Native

English: C1

TECHNICAL SKILLS

3D Art & Game Development:

- Blender – Modeling, sculpting, animation, rendering, UVs, retopology
- Substance Painter – PBR texturing and material creation
- Unreal Engine 5 – Environment creation, lighting, asset implementation and basic blueprints.

Environment & Visual Art

- 3D Environment & Asset Creation
- Lighting Design and mood creation
- Visual Storytelling and Composition
- PBR Workflow, Industry-standard material creation
- Game Asset Optimization

Additional Skills

Kanban / Trello / Jira

Microsoft Office / Google Workspace

Python / C# / C++

Technical troubleshooting & Problem Solving

ARTISTIC INTERESTS & STRENGTHS

Visual Research

Continuous exploration of artistic, architectural and environmental references to develop distinctive visual solutions.

Environment Art Projects

Academic and personal projects focused on environment composition, asset creation, lighting and visual storytelling.

Organization & Coordination

Experience coordinating projects, schedules and people across different activities and responsibilities.

Technical-Art Mindset

Able to approach artistic problems through both visual analysis and technical problem-solving
